

HOW TO CREATE A DDNS ACCOUNT AND A FREE* HOSTNAME FOR YOUR DYNAMIC IP, USING [WWW.NOIP.COM](http://www.noip.com) SERVICE

*please consider that free hostnames must be renewed each 30 days period.

To see complete M2M project please go to link:

<http://www.puntoflotante.net/M2M-TELEMETRIA-CONTROL-REMOTO.htm>

Step 1: go to site www.noip.com and click on 'Sign Up'

The screenshot shows the No-IP sign-up page in a web browser. The page title is "Create Your No-IP Account". The form contains the following fields:

- Username: planet-earth
- Password: masked with dots
- Email: puntoflotante@yahoo.com
- Confirm Email: puntoflotante@yahoo.com
- Hostname: planet-earth (highlighted with a green border)
- Domain: .ddns.net (selected from a dropdown menu)

Instructions on the right side of the form:

- Usernames must be 6-15 characters long and only contain a-z, 0-9, -, and _
- Minimum of 6 characters.
- Choose a hostname for your account. You can change your hostname or add more later.

There is a checkbox labeled "Create my hostname later" which is currently unchecked. Below the form, there is a section titled "Why not upgrade?" with a link to "Upgrade to No-IP Enhanced Today. Learn more about the benefits of upgrading below."

Step 2: choose username, password, mail address and hostname. Click on 'Free sign Up' at bottom of page. Observe that the word 'planet-earth' is just an example of a domain. You may choose the name you wish.

¿Quieres guardar la contraseña para noip.com? [Más información](#) Si No para este sitio

03:06 p. m. 04/03/2015

Step 3: Now you must confirm your account. Go to your mail and open your inbox.

Step 4: read the new message from NoIP.com and go to link provided.

Step 5. You are almost done. Go to link 'Verify Hostname Settings'

The screenshot displays the NoIP.com 'Manage Hosts' interface. On the left, a sidebar contains navigation links: 'Hosts/Redirects', 'Add Host', 'Manage Hosts' (selected), 'Manage Groups', 'Download Client', 'Upgrade to Enhanced', 'Need Help?', 'Support Center', 'Troubleshooting Guide', and 'Dynamic Update Client'. The main content area is titled 'Manage Hosts' and shows 'Current Hosts: 1'. A banner at the top right encourages upgrading the account. Below this is a table with the following data:

Host	IP/URL	Action
Hosts By Domain		
ddns.net		
planet-earth.ddns.net	189.249.187.58	Modify Remove

At the bottom right of the table area, there is an 'Add A Host' button. Below the table, a blue banner reads 'Add Google Apps to your Domain'. The Windows taskbar at the bottom shows the time as 03:17 p.m. on 04/03/2015.

Step 6: the site NoIP.com reads automatically your IP. Check that this IP corresponds to the actual IP of your modem router. You have now created a new Hostname for your DNS. You're done!
